

helixcode_docsync_audit

HelixCode Composite Doc-Sync Audit (§11.4.60 / §11.4.65)

Date: 2026-06-23 **Scope:** Read-only audit of governed .md documents for in-sync .html/.pdf(/.docx) sibling exports per §11.4.60 / §11.4.65 / §11.4.153. **Method:** epoch mtime comparison (sibling mtime ≥ .md mtime ⇒ fresh). **Authority:** §11.4.65 closed-set scope (INCLUDED: project-root *.md, docs/**/*.md, etc.). §11.4.153 adds .docx to the feature-Status set only.

1. Governed core doc-set sync table

Doc	.md mtime	.html	.pdf	.docx	VERDICT
docs/Issues.md	1782231922	fresh	fresh	fresh	in-sync
docs/Issues_Summary.md	1782231922	fresh	fresh	fresh	in-sync
docs/Fixed.md	1782231922	fresh	fresh	fresh	in-sync
docs/Fixed_Summary.md	1782231922	fresh	fresh	fresh	in-sync
docs/CONTINUATION.md	1782229446	fresh	fresh	n/a (not required)	in-sync
README.md	1780479622	fresh	fresh	n/a (not required)	in-sync
docs/features/Status.md	1782240015	fresh	fresh	fresh	in-sync
docs/features/Status_Summary.md	1782240238	fresh	fresh	fresh	in-sync

Core doc-set: 8/8 in-sync. All required .html/.pdf (and .docx for the feature-Status set) siblings exist and are ≥ their .md mtime. No regeneration needed for the core set.

Note: docs/features/ also contains a legacy helixcode-status.md / helixcode-status_summary.md pair (the docs_chain-registered names) whose exports are fresh (mtime 1782240xxx era export run). The newer Status.md/Status_Summary.md are the active §11.4.153 feature ledger and are in-sync.

2. docs/qa/*.md — §11.4.65 scope analysis (HONEST §11.4.6)

§11.4.65 closed-set scope INCLUDES docs/**/*.md explicitly. By the literal mandate text, every docs/qa/*.md requires .html + .pdf siblings in sync. **However**, the project's docs_chain instantiation (.docs_chain/contexts/*.yaml) registers ONLY specific

named docs (features Status pair, CONTINUATION, governance files, Issues/Fixed, xiaomi providers) — docs/qa/*.md are NOT wired into any docs_chain chain. So they are in §11.4.65 textual scope but have NEVER been mechanically exported.

This session created/modified the following docs/qa top-level .md files; NONE have current exports:

Doc	.html	.pdf	VERDICT
docs/qa/HXC-107_ledger_audit.md	MISSING	MISSING	missing-export
docs/qa/HXC-108_android_evidence.md	MISSING	MISSING	missing-export
docs/qa/ HXC-108_cli_recordings_evidence.md	MISSING	MISSING	missing-export
docs/qa/ HXC-108_desktopgui_features_evidence.md	MISSING	MISSING	missing-export
docs/qa/HXC-108_evidence_audit.md	MISSING	MISSING	missing-export
docs/qa/HXC-108_ios_evidence.md	MISSING	MISSING	missing-export
docs/qa/HXC-108_liveness_verification.md	MISSING	MISSING	missing-export
docs/qa/ HXC-108_remaining_platforms_evidence.md	MISSING	MISSING	missing-export
docs/qa/HXC-108_selftest_evidence.md	MISSING	MISSING	missing-export
docs/qa/ HXC-108_tui_server_recordings_evidence.md	MISSING	MISSING	missing-export
docs/qa/HXC-108_tui_views_evidence.md	MISSING	MISSING	missing-export
docs/qa/HXC-108_video_qa_matrix.md	MISSING	MISSING	missing-export
docs/qa/HXC-108_web_evidence.md	MISSING	MISSING	missing-export
docs/qa/ HXC-112_gui_content_verification.md	MISSING	MISSING	missing-export
docs/qa/RETRO_LEDGER.md	MISSING	MISSING	missing-export
docs/qa/README.md	STALE	STALE	stale-export

docs/qa verdict: 16 docs/qa .md files lack fresh exports (15 missing, 1 stale README). Per the literal §11.4.65 INCLUDED scope these are export-required. The conductor should EITHER regenerate .html+.pdf for each (preferred — matches the mandate text) OR, if the operator’s §11.4.35 instantiation intentionally treats docs/qa/ evidence transcripts as exempt, that exemption must be made explicit in the project governance (it is not currently documented, so this audit flags them rather than silently passing — §11.4.6 no-guessing).

3. §11.4.86 video-evidence fingerprint gate

scripts/gates/feature_video_evidence_gate.sh (read-only run):

```
GATE PASS: 8 cited durable evidence paths all exist; no rotatable-corpus c
fingerprint matches (0d8e196645b3da9efc48a65860ac768226dc8db1bef3cc298f3b0
EXIT=0
```

Sidecar docs/features/.video_evidence_roster.sha256 =
0d8e196645b3da9efc48a65860ac768226dc8db1bef3cc298f3b0dc3b708ba36
— consistent with the current Status.md confirmed set. **Gate: PASS.**

4. Exports needing regeneration (exact paths)

Core set: none.

docs/qa set (§11.4.65 textual scope — regenerate .html+.pdf for each, OR document an explicit exemption): - docs/qa/HXC-107_ledger_audit.{html,pdf} - docs/qa/HXC-108_android_evidence.{html,pdf} - docs/qa/HXC-108_cli_recordings_evidence.{html,pdf} - docs/qa/HXC-108_desktopgui_features_evidence.{html,pdf} - docs/qa/HXC-108_evidence_audit.{html,pdf} - docs/qa/HXC-108_ios_evidence.{html,pdf} - docs/qa/HXC-108_liveness_verification.{html,pdf} - docs/qa/HXC-108_remaining_platforms_evidence.{html,pdf} - docs/qa/HXC-108_selftest_evidence.{html,pdf} - docs/qa/HXC-108_tui_server_recordings_evidence.{html,pdf} - docs/qa/HXC-108_tui_views_evidence.{html,pdf} - docs/qa/HXC-108_video_qa_matrix.{html,pdf} - docs/qa/HXC-108_web_evidence.{html,pdf} - docs/qa/HXC-112_gui_content_verification.{html,pdf} - docs/qa/RETRO_LEDGER.{html,pdf} - docs/qa/README.{html,pdf} (regenerate — stale) - docs/qa/helixcode_docsync_audit.{html,pdf} (this new audit doc — also export-required)

5. Overall verdict

- **Core governed doc-set (Issues/Fixed/+summaries/CONTINUATION/README/feature-Status/+summary): RELEASE-READY** — all 8 in-sync, all required siblings fresh including the feature-Status .docx pair.
- **§11.4.86 video-evidence fingerprint gate: PASS.**
- ****docs/qa/*.md: 17 exports need regeneration**** (16 existing docs missing/stale + this audit doc) under the literal §11.4.65 docs/**/* .md INCLUDED scope.

Net: docs are release-ready for the core set; **17 docs/qa exports must be regenerated** (or an explicit §11.4.35 docs/qa exemption documented) before a release tag, to satisfy §11.4.65 for the full docs/**/* .md surface.
