

# HelixCode — Issues Summary

Generated **mechanically** from docs/Issues.md by scripts/generate\_issues\_summary.sh per Constitution §11.4.91 (summary clarity) + §11.4.12 (CM-ISSUES-SUMMARY-SYNC). Do not hand-edit — re-run the generator. Title column carries each item’s H2 heading (self-contained, ≥40 chars per §11.4.91); Notes is the first Closure/Evidence/Resolution line.

**Prefix convention:** IDs are scope-prefixed (HXC=root project; HXA=HelixAgent; HXL=HelixLLM; HXQ=HelixQA; HXV=LLMsVerifier; VEN=VisionEngine; PAN=panoptic; OPS=LLMOps). See docs/Issues.md “Prefix convention” for the legacy ISSUE-NNN mapping.

| ID      | Title                                                                                    | Type | Status                    | Discovered | Notes                                                                                                                                                             |
