Key Features to Port (Prioritized)

Critical (From Tier 1)

1.  Tool system with 30+ tools
2.  Permission system with rules
3.  Plan Mode with verification
4.  Team management
5.  KAIROS background service
6.  Dream system
7.  Repository mapping (tree-sitter)
8.  Sandboxed execution
9.  Browser automation
10.  Edit block format

Important (From Tier 1-2)

1.  Voice commands
2.  Auto-commit workflow
3.  Evaluation framework
4.  Context providers
5.  Agent modes

Next Steps

1.  Analyze all Tier 1 agents
2.  Analyze all Tier 2 agents
3.  Analyze remaining agents (Tier 3-5)
4.  Create master integration plan
5.  Implement Phase 2 features

Commits Made

All analysis work committed and pushed to: - github (vasic-digital/SuperAgent) - githubhelixdevelopment (HelixDevelopment/HelixAgent) - origin - upstream

Notes

- kiro-cli submodule has broken remote (repository not found)
- kilo-code has divergent branches (needs manual resolution)
- All other agents fetched/pulled successfully
