HXC-037 — §11.4.103-141 + CONST-048..060 anchor cascade backfill into 7 owned submodules

Evidence run: 2026-06-09

BEFORE (this session start): 30 cascade failures across 7 submodules

(captured earlier: debate_orchestrator/doc_processor/event_bus/helix_agent/llm_ops/
llm_orchestrator/llm_provider × {CONSTITUTION, CLAUDE, AGENTS}.md missing §11.9 +
CONST-048..060 + §11.4.103-121 heading anchors)

AFTER: verify-governance-cascade.sh (live re-run)

PASS

**Fix: scripts/backfill_anchor_cascade.sh — deterministic, additive-only
(§11.4.122), idempotent, verbatim golden (helix_qa) cascade**

Submodule commits (pushed to origin, fast-forward, no force §11.4.113):
