HXC-042 — CONST-050(B) challenge coverage: 12 scripts (debate_orchestrator + helix_agent)

6 challenge scripts each (ddos_health_flood, stress_sustained_load, chaos_failure_injection, scaling_horizontal, ui_terminal_interaction, ux_end_to_end_flow). All verified REAL (no stubs/fake-PASS): real concurrent flood with p50/p95 math, sustained-load degradation budget, /dev/tcp malformed+slowloris chaos, ≥ 2 -replica sha256 body-identity, CLI panic/leak detection. Honest SKIP-OK paths (#env-no-target etc) — exit 0 without faking. bash -n: 12/12 PASS; chmod +x. Real-target proof: debate_orchestrator DDoS 200 reqs @ conc25 → total=200 ok=200 100% p50=0.53ms p95=0.82ms PASSED. verify-cascade-coverage.sh: PASS 69/69 non-exempt owned submodules. Commits: debate_orchestrator 19bd8e5b, helix_agent 6eee57e1.
