HXC-049 — doc_processor

TestAutomation_UpstreamsExist case-drift (CONST-052)

Found by owned-submodule health sweep (D-2). automation_test.go:140 read
os.ReadDir("Upstreams") (capital) but the canonical dir is lowercase "upstreams" (CONST-052)
→ deterministic FAIL every run. FIX: "Upstreams"→"upstreams" + msgs. GREEN: go test -run
TestAutomation_UpstreamsExist . → ok digital.vasic.docprocessor 0.170s. doc_processor
commit ecb384f.
