HXC-051 — helix_llm + helix_memory go.mod CONST-052 build-breaks

Captured: 2026-06-09T14:54:03Z · Bug · Fixed (→ Fixed.md) ## helix_llm 36 capitalised replace => ../../vasic-digital/<Cap> directives repointed to flat lowercase siblings (e.g. => ../config, => ../event_bus, => ../mcp_module, => ../vector_db). Resolving paths exposed a missing toon go.sum entry → go mod download+tidy (1 indirect require added). go build ./... → exit 0 (LLM_BUILD_OK). Commit 72a1fdf, pushed ff32334d5..72a1fdf (github+gitlab tips confirmed). ## helix_memory digital.vasic.memory => ../../vasic-digital/Memory → => ../memory. go build ./... → exit 0 (MEMORY_BUILD_OK). Commit a677adc, pushed ff5f1dcb6..a677adc.
