HXC-056 — 7 submodules: CONST-052 capitalised replace => ../PliniusCommon

Captured: 2026-06-09T15:06:50Z · Bug · Fixed (→ Fixed.md) ## Defect auto_temp, claritas, gandalf_solutions, hyper_tune, leak_hub, ouroborous, veritas each had go.mod line 16 replace digital.vasic.pliniuscommon => ../PliniusCommon; the capitalised ../PliniusCommon dir is absent after the CONST-052 rename, the lowercase ../plinius_common exists → go build ./... failed on all 7. (3 of the 7 — auto_temp/claritas/veritas — had the edit in their working tree from a rate-limited subagent that died before committing; finished here.) ## Fix All 7 go.mod line 16 → => ../plinius_common (path-case only). ## Captured runtime evidence (real go build ./... per submodule)
