HXC-057 — recovery: wire unwired digital.vasic.concurrency require+replace

Captured: 2026-06-09T15:06:50Z · Bug · Fixed (→ Fixed.md) ## Defect recovery/pkg/breaker/breaker.go imports digital.vasic.concurrency/pkg/breaker (existing code, never wired per §11.4.124) but recovery/go.mod had no require/replace → go build ./... failed: “no required module provides package digital.vasic.concurrency/pkg/breaker”. ## Fix (wire-in, not delete §11.4.124) Added require digital.vasic.concurrency v0.0.0+replace digital.vasic.concurrency => ../concurrency; go mod tidy settled go.sum. ## Captured runtime evidence go build ./... → RECOVERY_BUILD_OK; go test ./pkg/breaker → ok 0.754s ## Commit recovery 105d0b4 (go.mod+go.sum), pushed ff c7efbcb..105d0b4 to all remotes.
