

evidence

Retroactive QA evidence — commit cee5cdae (run-id Phase-2)

RECONSTRUCTED, AFTER-THE-FACT DOCUMENTATION (HXC-039, §11.4.83). This file is NOT a captured-at-the-time end-user transcript. It is honest retroactive documentation created during the HXC-039 §11.4.83 back-fill, operator-authorized, to give a pre-existing commit its required docs/qa/<run-id>/evidence directory WITHOUT rewriting git history. No runtime output below is fabricated (§11.4.6 / §11.4.123).

Field	Value
Commit SHA	cee5cdae96adf30dd4075e87c9553e773ee4a69c
Short SHA	cee5cdae
Authored	2026-06-09T11:31:42+05:00
Subject	feat(meta): Phase-2 completion — 64-submodule §11.4.122-139 cascade + 4 CONST-055 gates green + .dockerignore (CONST-047/055)
run-id basename	Phase-2 (a verbatim substring of the commit subject)

What the commit changed (from `git show --stat`)

This is predominantly a **governance/meta cascade** commit: a §11.4.122–139 constitutional-anchor cascade across 64 submodule pointers, plus `.dockerignore`, docs-summary regen, and the docs/workable_items.db. The ONLY production-code touch that tripped the §11.4.83 feature heuristic is a one-line change:

```
helix_code/internal/worker/ssh_pool_consensus.go    | 2 +-

```

Other entries are `.dockerignore`, docs/*.md, docs/workable_items.db (Bin), and ~60 submodules/* pointer bumps — none of which are end-user features.

Verification that exists for this commit

- The single production-code line in `ssh_pool_consensus.go` is part of the worker consensus package, whose contemporaneous tests (`ssh_pool_consensus_test.go`, `consensus_*_test.go`) cover that surface (`go test ./internal/worker/...`).
- The substantive content of this commit (the 64-submodule anchor cascade + 4 CONST-055 gates) is governance, validated by the cascade verifier (`scripts/verify-governance-cascade.sh`) and the CONST-055 gates referenced in the subject — NOT an end-user runtime feature.

- This commit arguably should have carried a [no-qa-evidence] opt-out token (it is a meta/governance change, not a user-facing feature). This directory records that determination retroactively instead.

Honesty statement

Reconstructed documentation. NO faked PASS logs, NO fabricated runtime output. The bulk of this commit is governance, not a shippable end-user feature; the lone prod-code line is covered by the worker package's existing tests.
