Retroactive QA evidence — commit d985e3ae (run-id W6B)

RECONSTRUCTED, AFTER-THE-FACT DOCUMENTATION (HXC-039, §11.4.83). This file is NOT a captured-at-the-time end-user transcript. It is honest retroactive documentation created during the HXC-039 §11.4.83 back-fill, operator-authorized, to give a pre-existing feature commit its required docs/qa/<run-id>/evidence directory WITHOUT rewriting git history. No runtime output below is fabricated (§11.4.6 / §11.4.123).

Field	Value
Commit SHA	d985e3aeec90f053a9b6855ed2c9955ee1b28336
Short SHA	d985e3ae
Authored	2026-06-04T15:18:44+05:00
Subject	feat(worker): wire real in-process multi-node consensus election through SSH pool (W6B)
run-id basename	W6B (a verbatim substring of the commit subject)

What the commit changed (from `git show --stat`)

```
helix_code/internal/worker/consensus.go      |  51  ++++
helix_code/internal/worker/ssh_pool_consensus.go | 211  ++++++
helix_code/internal/worker/ssh_pool_consensus_test.go | 126  ++++++
3 files changed, 388 insertions(+)
```

Wires real in-process multi-node consensus election through the SSH worker pool: new consensus.go logic + ssh_pool_consensus.go transport, with a new test file in the same commit.

Verification that exists for this commit

- **Paired test file added in the SAME commit:** internal/worker/ssh_pool_consensus_test.go (126 new lines) directly exercises the new election wiring (`go test ./internal/worker/...`). This is the contemporaneous guard for the feature.
- **No captured runtime transcript was recorded at commit time** under docs/qa/. This directory is retroactive documentation, not an original runtime replay.

Honesty statement

Reconstructed documentation. NO faked PASS logs, NO fabricated runtime output. Asserted verification = the in-commit worker consensus unit-test file visible in `git show d985e3ae`.
