## Retroactive QA evidence — commit 9970507d (run-id ref-hygiene)

**RECONSTRUCTED, AFTER-THE-FACT DOCUMENTATION (HXC-039, §11.4.83).** This file is NOT a captured-at-the-time end-user transcript. It is honest retroactive documentation created during the HXC-039 §11.4.83 back-fill, operator-authorized, to give a pre-existing feature commit its required docs/qa/<run-id>/evidence directory WITHOUT rewriting git history. No runtime output below is fabricated (§11.4.6 / §11.4.123).

| Field           | Value                                                                                                    |
|-----------------|----------------------------------------------------------------------------------------------------------|
| Commit SHA      | 9970507d75c9c758aab5adfd673ae7460532b8bb                                                                 |
| Short SHA       | 9970507d                                                                                                 |
| Authored        | 2026-06-03T22:51:55+05:00                                                                                |
| Subject         | fix(phase3): helix_code cross-platform build (§11.4.81) + flatten ref-hygiene + helix_agent tidy pointer |
| run-id basename | ref-hygiene (a verbatim substring of the commit subject)                                                 |

### What the commit changed (from git show --stat)

```
helix_code/internal/cache/cache.go | 2 +-
helix_code/.../i18n_wiring/wiring_integration_test.go | 2 +-
helix_code/internal/tools/shell/sandbox.go | 42 +++++-----
helix_code/internal/tools/shell/sandbox_linux.go | 32 ++++++
helix_code/internal/tools/shell/sandbox_nonlinux.go | 28 ++++++
helix_code/tests/integration/cmd/p1f14_challenge/main.go | 10 +---
scripts/propagate-governance.sh | 1 -
submodules/helix_agent | 2 +-
8 files changed, 79 insertions(+), 40 deletions(-)
```

A §11.4.81 **cross-platform-parity** fix: the shell sandbox was split into sandbox\_linux.go / sandbox\_nonlinux.go build-tag variants (so the helix\_code build works on non-Linux platforms), plus a cache fix, flatten ref-hygiene, and a helix\_agent pointer bump.

### Verification that exists for this commit

- The change is a build-tag split implementing §11.4.81 per-OS parity; its correctness is a **compile-on-each-platform** property (make verify-compile per supported OS) plus the existing sandbox unit tests under internal/tools/shell/.
- tests/integration/cmd/p1f14\_challenge/main.go was updated in the same commit (integration challenge harness).

- **No captured runtime transcript was recorded at commit time** under `docs/qa/`. This directory is retroactive documentation.

## Honesty statement

Reconstructed documentation. NO faked PASS logs, NO fabricated runtime output. The asserted verification is the cross-platform compile property + existing sandbox tests, both visible in `git show 9970507d`.
