Retroactive QA evidence — commit 5c5c44bc (run-id round468d)

RECONSTRUCTED, AFTER-THE-FACT DOCUMENTATION (HXC-039, §11.4.83). This file is NOT a captured-at-the-time end-user transcript. It is honest retroactive documentation created during the HXC-039 §11.4.83 back-fill, operator-authorized, to give a pre-existing commit its required docs/qa/<run-id>/evidence directory WITHOUT rewriting git history. No runtime output below is fabricated (§11.4.6 / §11.4.123).

Field	Value
Commit SHA	5c5c44bc fcd648b776320561534a2d9a82c220ff
Short SHA	5c5c44bc
Authored	2026-06-04T12:50:46+05:00
Subject	fix(meta): Wave5 – compose-test creds (CONST-042) + config BackupConfig MkdirAll + 2 pointer bumps (round468d)
run-id basename	round468d (a verbatim substring of the commit subject)

What the commit changed (from git show --stat)

```
docker-compose.test.yml | 21 ++++++++-----
docs/CONTINUATION.md | 8 +++++
helix_code/internal/config/config.go | 8 +++++
helix_code/internal/config/fresh_install_save_test.go | 30 ++++++

submodules/helix_qa | 2 +-
6 files changed, 61 insertions(+), 10 deletions(-)
```

A “Wave5” meta commit: compose-test credential hygiene (CONST-042), a BackupConfig MkdirAll fix in internal/config/config.go, and 2 submodule pointer bumps. The production-code touch tripping the feature heuristic is the config.go MkdirAll fix.

Verification that exists for this commit

- **Paired unit test added in the SAME commit:** internal/config/fresh_install_save_test.go (30 new lines) covers the config BackupConfig/MkdirAll save path (go test ./internal/config/...).
- The compose-test credential change is config hygiene (CONST-042), not an end-user runtime feature.
- **No captured runtime transcript was recorded at commit time** under docs/qa/. This directory is retroactive documentation.

Honesty statement

Reconstructed documentation. NO faked PASS logs, NO fabricated runtime output. Asserted verification = the in-commit config unit-test delta visible in `git show 5c5c44bc`.
