Retroactive QA evidence — commit 81f3c482 (run-id unique)

RECONSTRUCTED, AFTER-THE-FACT DOCUMENTATION (HXC-039, §11.4.83). This file is NOT a captured-at-the-time end-user transcript. It is honest retroactive documentation created during the HXC-039 §11.4.83 back-fill, operator-authorized, to give a pre-existing feature commit its required docs/qa/<run-id>/evidence directory WITHOUT rewriting git history. No runtime output below is fabricated: where original captured evidence does not exist, that is stated plainly (§11.4.6 / §11.4.123).

Field	Value
Commit SHA	81f3c482a40e7bde6d78e1821680895352aa6bae
Short SHA	81f3c482
Authored	2026-06-09T13:14:24+05:00
Subject	fix(deployment): real unique deploy IDs + real perf benchmark (2 production bugs)
run-id basename	unique (a verbatim substring of the commit subject — the §11.4.83 gate matches the run-id against the subject)

What the commit changed (from `git show --stat`)

```
helix_code/internal/deployment/production_deployer.go      | 68 ++++++++
helix_code/internal/deployment/production_deployer_test.go | 18 +++++-
2 files changed, 63 insertions(+), 23 deletions(-)
```

Two production bugs in `internal/deployment/production_deployer.go` were fixed: (1) deployment IDs were not genuinely unique, and (2) the performance benchmark path was not a real measurement. The fix landed alongside changes to the package's own `_test.go` file.

Verification that exists for this commit

- **Paired unit test changes:** `production_deployer_test.go` was modified in the SAME commit, so the fix is covered by the package's unit suite (`go test ./internal/deployment/...`). The test delta is the contemporaneous guard for the two fixes.
- **No captured runtime transcript was recorded at commit time** for this feature under `docs/qa/`. This directory is retroactive documentation, not a replay of original runtime output.

Honesty statement

This is reconstructed documentation. It contains NO faked PASS logs and NO fabricated runtime output. The only verification asserted is the in-commit unit-test delta visible in `git show 81f3c482`.
