5. **Completed** — Done
6. **Blocked** — Waiting on dependency

Ticket Actions

- **Assign:** Click “Assign” and select team member
 - **Comment:** Add comments in the comment section
 - **Attach:** Upload files and attachments
 - **Link:** Link related tickets
-

Boards

Kanban Board

1. Click “Boards” in the sidebar
2. Select a board
3. Drag and drop tickets between columns
4. Filter by assignee, priority, or type

Board Columns

- **Backlog:** Not yet started
 - **To Do:** Ready to start
 - **In Progress:** Being worked on
 - **Review:** Under review
 - **Done:** Completed
-

Chat

Starting a Chat

1. Click “Chat” in the sidebar
2. Select a channel or direct message
3. Type your message
4. Press Enter to send

Chat Features

- **Emoji:** Click emoji button
 - **Attachments:** Click attachment button
 - **Reactions:** Click on message to react
 - **Threads:** Reply to specific messages
-

Documents

Creating Documents

1. Click “Documents” in the sidebar
2. Click “Create Document”
3. Enter title and content
4. Click “Save”

Document Features

- **Markdown:** Write in Markdown
 - **Export:** Export to PDF, HTML, DOCX
 - **Share:** Share with team members
 - **Version History:** Track changes
-

Reports

Viewing Reports

1. Click “Reports” in the sidebar
2. Select report type:
 - Ticket statistics
 - Team performance
 - Project progress
 - Time tracking

Custom Reports

1. Click “Create Report”
 2. Select metrics
 3. Configure filters
 4. Save report
-

Settings

User Settings

Sources verified 2026-06-22: /Volumes/T7/Projects/helix_track/ (sibling HelixTrack source tree) , <https://github.com/Helix-Track/Everything>

REPO-STATE-DERIVED (per §11.4.99 the sources are the cross-referenced HelixTrack source tree + upstream umbrella, following the docs/ARCHITECTURE.md precedent). Cross-referenced on 2026-06-22: - The manual describes the HelixTrack project (a project management / issue tracking system) whose clients + Core service are confirmed present locally and in the github.com/Helix-Track/Everything umbrella repo. - Keyboard shortcuts and UI flows describe the project's own clients (Angular 19 web/desktop, confirmed from their `package.json`); no external third-party service version is asserted that needs staleness-checking. - This is end-user documentation for HelixTrack itself; re-verify any step against the live client/backend behaviour as the project evolves.
